SKILLS

- **Languages:** HTML, CSS, Python, JavaScript, C++, DSA
- **Frameworks:** HTML and CSS, React.js, Next.js (App Router), Fast API
- **Tools/Platform:** MySQL, Git/GitHub, Capacitor, Android Studio, Firebase
- **Soft Skills:** Problem-Solving, Adaptability, Quick Learning

PROJECTS

Expense – An Expense Tracker App | [GitHub](#)

jun25

- Developed a full-stack expense tracking application enabling users to record, categorize, and monitor daily expenses with real-time financial insights using modern web technologies.
- Implemented secure user authentication, transaction management, expense categorization, and interactive dashboards with filtering and analytics features for efficient budget tracking.
- Designed an optimized database structure and reporting system to improve expense analysis accuracy, helping users track spending patterns and make better financial decisions.

MediCore – Smart Hospital Management System, | [GitHub](#)

jun26

- Developed a Smart Hospital Management System in Java with modules for emergency triage, OPD appointments, patient search, hospital navigation, and doctor roster management.
- Implemented core Data Structures & Algorithms including Priority Queue for emergency triage, Queue for OPD management, Binary Search for **O(log n)** patient lookup, and Graph/BFS for hospital navigation.
- Designed an efficient, modular **system** that applies DSA concepts to real-world healthcare workflows, improving patient lookup, appointment handling, emergency prioritization, and hospital navigation.

Aesthetic Clock & Smart Alarm, | [GitHub](#)

sep26

- Developed a responsive Clock & Smart Alarm application using React and TypeScript, featuring live clock, customizable alarms, precision stopwatch, circular timer, and 12/24-hour display modes.
- Implemented a cross-platform user experience with animated interfaces, customizable alarm scheduling, mobile haptics, motion-based snooze, and Firebase-based cloud synchronization.
- Built a cross-platform experience with Framer Motion, Web Audio API, Capacitor haptics, and Firebase Firestore synchronization, enabling smooth animations, native mobile interactions, and cloud-synced alarms.

Training

Data Structure Fundamental- [Certificate](#)

Jun26

- Gained practical understanding of Data Structures and Algorithms in Java, including Priority Queue, Queue, Binary Search, Graph/BFS, and Sorting, and learned how to apply them to real-world problems.
- Learned how to improve software efficiency using optimized algorithms—for example, using Binary Search for $O(\log n)$ patient lookup and BFS for finding the shortest hospital route.
- I developed the Smart Hospital Management System in Java, implementing modules for emergency triage using Priority Queue, OPD appointments using Queue, patient search using Binary Search, hospital navigation using Graph/BFS, and doctor ranking using Sorting.

CERTIFICATES

- | | |
|--|-------|
| • Ai Tools Workshops –Be10x LINK | sep25 |
| • Basic Python – Skillera LINK | jan25 |
| • Linux Command and shells – Skillera LINK | dec25 |
| • Programming Using C++ – Infosys LINK | jan26 |
| • Java with Html-Css –Udemy LINK | feb26 |
| • DMBS – Infosys LINK | feb26 |
| • Data Structure and Fundaments LINK | jun26 |
| • Ai database certified – Oracle LINK | sep26 |

EDUCATION

- | | |
|--|-------------------------|
| • Lovely Professional University | Punjab, India |
| • Bachelor of Technology - Computer Science and Engineering; | 2024-2028 |
| • Sri Chaitanya School | Perumal malai, Salem |
| • Intermediate; Percentage: 71 | April 2022 - March 2024 |
| • Sri vidya mandir school | Steel plant, Salem |
| • Matriculation; Percentage: 75 | April 2020 - March 2022 |
